

DANSO DANIEL KWAKU ARNAN

Accra, Ghana | 0203506800 | ddanso3000@gmail.com | github.com/obfdanso

PROFESSIONAL SUMMARY

Third-year Computer Science student at KNUST focused on frontend development. I build responsive web interfaces with React, TypeScript, and Tailwind CSS, and I am researching machine learning for web accessibility. Recently completed an internship at Vobiss Ghana Limited, an ISP, where I worked with network operations and field engineering teams. Looking to grow into a frontend engineer who ships clean, accessible, and fast user interfaces.

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, React Native, Tailwind CSS, Vite

Programming: Java, Python, C++

Tools & Platforms: Git, GitHub, Supabase, Cisco Packet Tracer

Soft Skills: Team coordination, problem solving, documentation and record keeping

PROJECTS

MediSpace (Web Application)

React, TypeScript, Vite, Tailwind CSS, Supabase

- Built a healthcare web application in TypeScript with a reusable component architecture and Supabase as the backend.
- Designed a responsive, mobile-friendly interface with Tailwind CSS and set up linting and a Vite build pipeline for fast development.

github.com/obfdanso/MediSpace

E-XGBoost Web Accessibility Detection (Research Project)

Python, XGBoost, SHAP, Selenium

- Ongoing supervised research on automated detection of WCAG 2.1 accessibility defects in DOM structures of Ghanaian websites.
- Combines DOM feature extraction with an engineered XGBoost model and SHAP explainability, benchmarked against three baselines.

github.com/obfdanso/e-xgboost-web-accessibility

Binance App Clone (Mobile Application)

React Native

- Built the trading interface screens for a functional clone of the Binance mobile app in a team of seven.
- Owned specific modules of the codebase and integrated them into the final build.

github.com/obfdanso/BINANCE_CLONE

POS System

JavaScript

- Developed a point-of-sale student project handling product entry, sales, and simple record keeping.

EXPERIENCE

Intern, Vobiss Ghana Limited (ISP)

2026, 3 weeks

- Supported the Network Operations Centre by monitoring client links and logging faults.
- Joined field engineering teams on fibre optic installation and maintenance visits across Teshie, Labadi, Kasoa, Spintex, Suhum, and Tema.
- Configured VLANs, inter-VLAN routing, and DHCP in Cisco Packet Tracer lab exercises.
- Gained working knowledge of the OSI and TCP/IP models, OSPF, BGP, DNS, and GPON fibre networks.

EDUCATION

BSc Computer Science, KNUST, Kumasi

Expected September 2027
